

Manus AI Prompt Library for AdSense Approval

How to Use This Library

This library contains all the key prompts used throughout the AdSense approval journey, organized by phase. Each prompt is:

- **Copy-paste ready** - Just replace the placeholders with your specific information
- **Tested and proven** - These are the actual prompts that led to successful approval
- **Contextual** - Includes notes on when and why to use each prompt

Placeholders to replace:

- [your URL] - Your website URL
- [your niche] - Your content topic/industry
- [your audience] - Your target audience description
- [specific topic] - A specific article topic
- [platform] - Your website platform (Wix, WordPress, etc.)
- [your technical skill level] - Beginner, intermediate, or advanced

PHASE 1: FOUNDATION SETUP

Prompt 1: Platform Selection Advice

When to use: When deciding which website platform to use

Purpose: Get expert guidance on choosing the right platform for AdSense

Prompt:

Plain Text

I'm starting a website about [your niche] to eventually monetize with Google AdSense. I'm deciding between Wix, WordPress, and Squarespace. What are the pros and cons of each for AdSense approval, and which would you recommend for someone with [your technical skill level]?

Prompt 2: Domain Name Evaluation

When to use: When choosing a domain name

Purpose: Get feedback on domain name options before purchasing

Prompt:

Plain Text

I'm considering these domain names for my [niche] website: [list 3-5 options]. Which would be best for AdSense approval and SEO? Are there any red flags I should avoid?

PHASE 2: ESSENTIAL PAGES

Prompt 3: Homepage Review

When to use: After creating your homepage

Purpose: Get feedback on whether your homepage meets AdSense standards

Prompt:

Plain Text

Please review my homepage at [your URL] and provide feedback on whether it meets Google AdSense requirements. Check for: clear purpose, professional design, easy navigation, and trustworthiness signals.

Prompt 4: Privacy Policy Verification

When to use: After creating your Privacy Policy page

Purpose: Verify the Privacy Policy is crawlable and complete

Prompt:

Plain Text

Please check my Privacy Policy page at [your URL]/privacy and verify:

1. Is the content crawlable (not in an iframe)?
2. Does it cover all necessary sections for AdSense approval?
3. Are there any missing elements?

Prompt 5: About Page Enhancement

When to use: When drafting or improving your About page

Purpose: Get suggestions to make your About page more compelling

Prompt:

Plain Text

Here's my About page draft: [paste your content]. Please suggest improvements to make it more compelling and trustworthy for AdSense reviewers. What credentials or information should I add?

Prompt 6: Iframe Crawlability Test

When to use: To check if your Privacy Policy or Terms & Conditions are in iframes

Purpose: Detect the critical iframe problem that blocks many approvals

Prompt:

Plain Text

Please navigate to my Privacy Policy page at [your URL]/privacy and tell me how many characters of content you can extract. If it's less than 10,000 characters, there's likely an iframe problem. Also check my Terms & Conditions page at [your URL]/terms.

Prompt 7: Iframe Content Extraction

When to use: If Manus confirms your content is in an iframe

Purpose: Extract the content so you can paste it as native text

Prompt:

Plain Text

My Privacy Policy is in an iframe. Please extract the full content and create a formatted HTML version that I can paste directly into my website as native content, preserving all headings, links, and formatting. Do the same for my Terms & Conditions.

PHASE 3: CONTENT CREATION

Prompt 8: Content Strategy Development

When to use: Before starting to create content

Purpose: Develop a comprehensive content strategy aligned with AdSense requirements

Prompt:

Plain Text

I'm creating a website about [your niche] for [your audience]. Help me develop a content strategy that will meet Google AdSense requirements. Suggest 5-7 main content categories and explain why each would be valuable for both my audience and AdSense approval.

Prompt 9: Topic Generation

When to use: When planning your content calendar

Purpose: Generate a list of article topics that will appeal to both readers and AdSense reviewers

Prompt:

Plain Text

For my [niche] website targeting [your audience], suggest 20 blog post topics that would:

1. Provide genuine value to my audience
2. Demonstrate expertise and authority
3. Be AdSense-friendly (no prohibited content)
4. Cover different aspects of my main categories
5. Be substantial enough for 1000-1500 word articles

Prompt 10: Article Outline Creation

When to use: Before writing each article

Purpose: Create a structured outline to ensure comprehensive, valuable content

Prompt:

Plain Text

Create a detailed outline for a blog post about [specific topic]. Include:

- An engaging introduction that hooks the reader
- 4-6 main sections with descriptive subheadings

- Key points to cover in each section
 - Practical examples or case studies where relevant
 - A conclusion with actionable takeaways
- Target length: 1200-1500 words

Prompt 11: Content Quality Review

When to use: After writing an article, before publishing

Purpose: Get feedback on content quality and AdSense compliance

Prompt:

Plain Text

Please review this article draft for AdSense compliance:

[paste your article]

Check for:

1. Content quality and originality
2. Readability and structure
3. SEO optimization (headings, keywords, meta description)
4. Policy violations (prohibited content, deceptive practices)
5. Areas for improvement
6. Estimated word count
7. Overall rating (1-10) for AdSense approval readiness

Prompt 12: Content Audit

When to use: After publishing 10+ articles, before applying for AdSense

Purpose: Get a comprehensive assessment of all your content

Prompt:

Plain Text

Please review all the blog posts on my website at [your URL]/blog and provide:

1. A quality assessment of each post (title and brief evaluation)
2. Identification of thin content (under 800 words)
3. Detection of duplicate or overlapping content
4. Posts that might violate AdSense policies
5. Overall content readiness score (1-10)

6. Recommendations for improvement before applying
7. Suggested minimum number of additional posts needed (if any)

PHASE 4: TECHNICAL OPTIMIZATION

Prompt 13: Structured Data Implementation

When to use: After you have content published and are ready for technical optimization

Purpose: Implement Schema.org structured data to help Google understand your site

Prompt:

Plain Text

I need to implement structured data on my website to improve AdSense approval chances. Please:

1. Create Entity schema for me (Person) and my brand (Organization) with this information:
 - Name: [your name]
 - Title/Role: [your title]
 - Bio: [brief bio]
 - Social profiles: [LinkedIn, YouTube, Twitter URLs]
2. Verify BlogPosting schema is present on my blog articles
3. Create and implement Breadcrumb schema
4. Use the Wix API (or appropriate method for my platform) to inject this data
5. Verify it's working with Google's Rich Results Test

Prompt 14: Site Audit Analysis

When to use: After running a site audit with Ahrefs, SEMrush, or similar tool

Purpose: Get a prioritized action plan to fix technical issues

Prompt:

Plain Text

I'm logged into Ahrefs (or [your audit tool]). Please analyze my site audit reports for [your URL] and create a prioritized action plan to achieve a 100% health score. Focus on issues that would impact AdSense approval.

Organize by:

- Priority 1 (Critical - Must fix before applying): Issues that would cause

automatic rejection

- Priority 2 (High - Should fix before applying): Issues that significantly impact approval likelihood
- Priority 3 (Medium - Nice to fix): Issues that improve overall site quality

For each issue, provide:

- What the issue is
- Why it matters for AdSense
- How to fix it
- Estimated time to fix

Prompt 15: Internal Linking Strategy

When to use: After you have 15+ articles published

Purpose: Create a strategic internal linking plan to strengthen site structure

Prompt:

Plain Text

Analyze my blog posts at [your URL]/blog and suggest 20 high-priority internal links that will:

1. Strengthen my site's SEO
2. Improve user experience by connecting related content
3. Create topical clusters around my main categories
4. Demonstrate clear site structure to Google

For each link, specify:

- Which post to edit (exact title)
- Where to add the link (describe the section or provide a search term)
- What anchor text to use
- Which post to link to (exact URL)
- Why this connection matters (topical relevance)

Focus on creating bidirectional links between related posts.

Prompt 16: Crawlability Verification

When to use: Before final submission, to verify all critical pages are crawlable

Purpose: Ensure Google's crawler can access all essential content

Prompt:

Plain Text

Please conduct a crawlability test on these critical pages:

1. Homepage: [your URL]
2. Privacy Policy: [your URL]/privacy
3. Terms & Conditions: [your URL]/terms
4. About page: [your URL]/about
5. Sample blog post: [your URL]/post/[sample-post]

For each page, report:

- How many characters of content you can extract
- Whether any content is in iframes
- Any crawlability issues detected
- Page load time (if measurable)
- Mobile responsiveness
- Recommendations for fixes

This is critical for AdSense approval - be thorough!

Prompt 17: 404 Error Resolution

When to use: When your site audit reveals broken pages

Purpose: Get specific guidance on fixing 404 errors

Prompt:

Plain Text

My site audit shows [number] 404 errors. Please:

1. Access my site audit tool and identify all 404 pages
2. For each 404 page, determine:
 - The broken URL
 - How many pages link to it
 - What the correct URL should be (if it exists)
 - Whether to create a 301 redirect or remove the links
3. Provide step-by-step instructions for fixing these in [your platform]
4. Prioritize by number of inlinks (fix highest traffic first)

PHASE 5: PRE-SUBMISSION REVIEW

Prompt 18: Comprehensive Pre-Submission Review

When to use: Right before submitting your AdSense application

Purpose: Get a final, comprehensive assessment of your approval likelihood

Prompt:

Plain Text

Please conduct a comprehensive pre-AdSense review of my website at [your URL]. This is my final check before submitting my application.

Please review:

1. Content quality and quantity
2. Technical SEO and site health
3. Privacy Policy and Terms & Conditions (verify crawlability!)
4. Essential pages
5. Policy compliance
6. User experience

Provide:

- A realistic assessment of my approval likelihood (percentage)
- Any critical issues that MUST be fixed before applying
- Any recommended improvements
- A final go/no-go recommendation

Be honest and thorough - I want to maximize my approval chances.

Prompt 19: Mobile Experience Check

When to use: As part of your pre-submission review

Purpose: Verify your site works well on mobile devices

Prompt:

Plain Text

Please check my website [your URL] for mobile responsiveness. Test:

1. Homepage
2. A sample blog post
3. Privacy Policy page
4. About page

Report any issues with:

- Layout on mobile devices
- Text readability
- Image sizing and loading
- Navigation usability
- Loading speed on mobile

Prompt 20: Policy Compliance Scan

When to use: As part of your pre-submission review

Purpose: Ensure no content violates AdSense policies

Prompt:

Plain Text

Please scan my website [your URL] for any content that might violate Google AdSense policies. Check for:

- Prohibited content
- Deceptive practices
- Inappropriate language
- Misleading claims

For each issue found, specify the page and suggest how to fix it.

PHASE 6: POST-REJECTION ANALYSIS

Prompt 21: Rejection Analysis

When to use: If you receive an AdSense rejection

Purpose: Understand the specific reason and create an action plan

Prompt:

Plain Text

I received an AdSense rejection with this reason: [paste rejection message]

Please:

1. Analyze what this rejection reason likely means
2. Audit my website [your URL] to identify the specific issues
3. Create a detailed action plan to fix these issues
4. Assess how long fixes will take
5. Provide a timeline for reapplication
6. Estimate my approval likelihood after implementing fixes

PHASE 7: POST-APPROVAL OPTIMIZATION

Prompt 22: Ad Placement Strategy

When to use: After getting AdSense approval

Purpose: Optimize ad placement for revenue without hurting user experience

Prompt:

Plain Text

I've been approved for AdSense! Please help me create an ad placement strategy for my website [your URL].

Suggest:

- How many ads per page
- Where to place each ad
- What ad types to use
- A/B testing plan
- Metrics to monitor

Start conservatively - I can always add more ads later.

QUICK REFERENCE: PROMPTS BY GOAL

"I need to check if my site is ready to apply"

→ Use Prompt 18: Comprehensive Pre-Submission Review

"I got rejected and don't know why"

→ Use Prompt 21: Rejection Analysis

"I need to fix my Privacy Policy iframe problem"

→ Use Prompt 6 (to detect) then Prompt 7 (to fix)

"I need help creating content"

→ Use Prompts 8, 9, 10, 11 in sequence

"I need to fix technical issues"

→ Use Prompt 14: Site Audit Analysis

"I need to add internal links"

→ Use Prompt 15: Internal Linking Strategy
