Getting Started: Quick Content Generation

Tip 1: One-Line Prompts

Generate complete presentations from a single sentence

- Go to gamma.app and click 'Create New'
- Choose 'Generate'
- Type your one-line prompt
- Select cards and tone, pick theme

Example Prompt

"Create me a presentation on the UK's new industrial strategy with 8 cards, in fluent UK English."

Pro Note: Perfect for quick drafts, but always review and fact-check AI outputs for accuracy.

Transform Existing Content

Tip 2: Paste Long Text for Summaries

Turn lengthy articles, reports, or notes into concise presentations instantly.

01

Access Paste Feature

Click 'Create New' then choose 'Paste'

02

Input Your Content

Paste your text (article, report, notes)

Perfect for: Reports, blog posts, research papers, meeting notes

03

Configure Settings

Select 'Summarise long text', set cards and theme

- **Example:** "Summarise this article into 6 slides for an executive briefing."

Import and Repurpose Content

Tip 3: Import Documents and Web Pages

Breathe new life into existing content by importing from multiple sources.

Upload Files

Word, PDF, PowerPoint
files supported

Import URLs

Paste any web page URL
directly

Transform

Pick style and generate
instantly

Example Prompt: "Import <https://example.com/blog/ai-policy> and summarise into 8 slides with risks and recommendations."

Pro Tip: This feature is invaluable for repurposing existing content across different formats and audiences.

Advanced Content Creation Techniques

Tips 4-8: Power User Strategies

These intermediate techniques will elevate your Gamma creations to professional standards.

1 Custom Template Creation

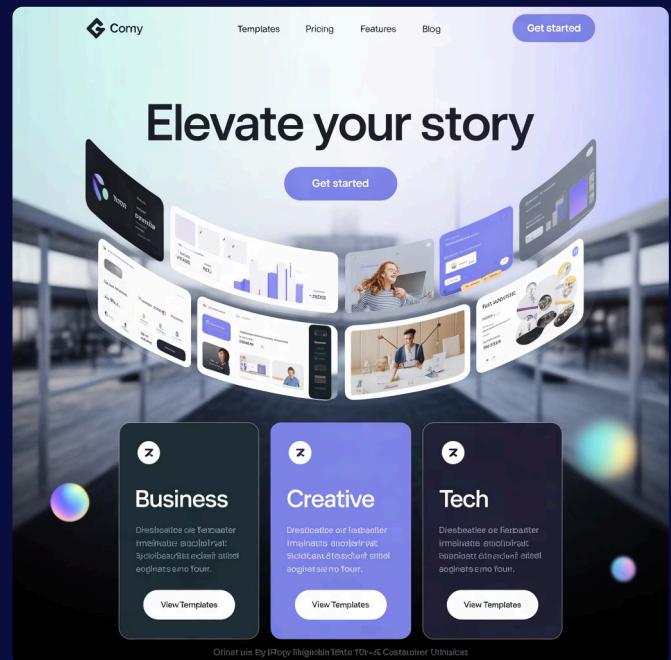

Build reusable templates for consistent branding across all your presentations

2 Advanced Prompt Engineering

Craft detailed prompts that specify tone, audience, and desired outcomes

3 Multi-Source Integration

Combine data from various sources into cohesive narratives

Remember: Each technique builds upon the previous ones, creating a comprehensive workflow for professional content creation.

Visual Design and Layout Mastery

Tips 9-14: Creating Visual Impact

Transform your content with sophisticated visual design principles and layout techniques.

Color Psychology

Use strategic color choices to evoke emotions and guide attention. Leverage theme colors like accent purple for emphasis and [deep blue](#) for trust.

Layout Hierarchy

Structure information using visual hierarchy principles. Balance white space with content density to create scannable, engaging presentations.

Strategic Imagery

Select images that amplify your message rather than just decorating. Every visual element should serve a purpose in your narrative.

Pro Insight: Great design isn't about adding more elements—it's about making intentional choices that serve your audience's needs.

Data Visualization Excellence

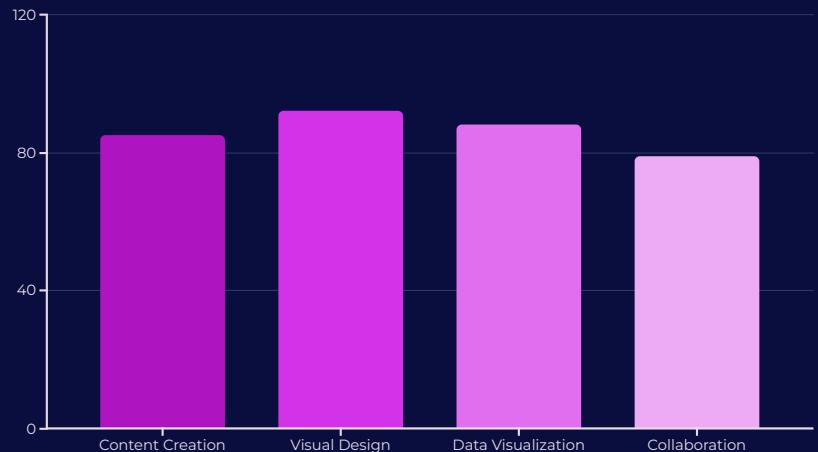

Tips 15-18: Charts & Analytics

Transform raw data into compelling visual stories that drive decision-making.

Chart Selection

Choose the right visualization for your data type and story

Focus Points

Highlight key insights with strategic color and annotation

Collaboration and Workflow Optimization

Tips 19-22: Team Productivity

Streamline your workflow and enhance team collaboration with these advanced techniques.

Real-time Collaboration

Enable simultaneous editing and commenting for seamless teamwork across time zones and departments.

Approval Workflows

Set up structured review processes that keep projects moving while maintaining quality standards.

1

2

3

4

Version Control

Track changes and maintain document history to ensure nothing important gets lost in the revision process.

Export & Distribution

Share your work across platforms with flexible export options and presentation modes.

- Team Tip:** Establish clear naming conventions and folder structures early to maintain organization as your team grows.

Advanced Features and Automation

Tips 23-25: Expert Level

Master these final techniques to become a true Gamma power user and unlock the platform's full potential.

AI-Powered Automation

Set up intelligent workflows that adapt content based on audience and context, saving hours of manual work.

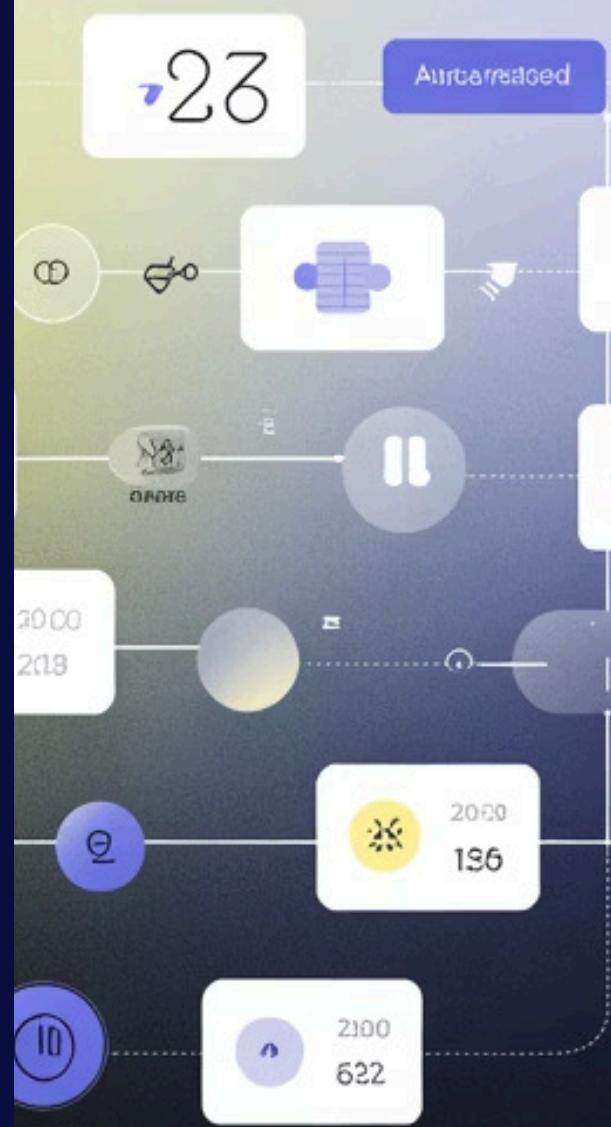

"The difference between good and great presentations lies in the details and the strategic use of advanced features."
